PROFILE SUMMARY

Computer Science Engineering graduate specializing in full-stack web development, AI workflow automation, and decentralized technologies. Proven track record of building production-ready applications using React, JavaScript/TypeScript, and Firebase, along with published research in zero-knowledge cryptography. Adept at full-stack application lifecycle management, API integration, and collaborative software engineering.

EXPERIENCE

Apprenticeship | Metacrafters

May 2024 – Jul 2024

- Completed an intensive hands-on apprenticeship focused on modern web development and smart contract engineering fundamentals, including decentralized application design.
- Applied structured learning to real-world coding exercises, building strong proficiency in Web3 architectures, problem-solving, and web technologies.

PROJECTS

Hunter – Autonomous AI Browser Copilot | Live | GitHub

2026

- Built an AI-powered browser copilot that automates business workflows from natural language instructions across multiple digital platforms.
- Developed intelligent requirement analysis, document matching, and automated form-filling features to eliminate manual operational friction.
- Coordinated planning, execution, and reporting modules while managing multiple parallel workflows.

Tools: JavaScript, TypeScript, Node.js, Web Automation, AI Agents

Melody – Music Streaming Platform | Live | GitHub

2026

- Developed and deployed a consumer-facing web platform supporting secure authentication, third-party API integration, and dynamic audio state management.
- Independently managed project planning, feature prioritization, cloud deployment, and issue resolution while maintaining high performance.

Tools: React 19, Tailwind CSS, Firebase, Zustand, Vite

Smart Civic Issue Reporting Platform | Live | GitHub

2025

- Built a complaint management web application that streamlines municipal issue reporting, tracking, and resolution through structured digital workflows.
- Implemented Firebase Authentication and Firestore real-time database for secure access and automated status updates.

Tools: React.js, Tailwind CSS, Firebase, JavaScript

SKILLS

Languages: C, C++, JavaScript, TypeScript, HTML5, CSS3

Frontend Development: React.js, React 19, Tailwind CSS, Zustand, Vite

Backend & Databases: Firebase, Firestore, REST APIs, Authentication Protocols

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools & Platforms: Git, GitHub, Vercel, VS Code, Figma, CI/CD Basics

EDUCATION

B.E. in Computer Science and Engineering | Chandigarh University

Aug 2022 – Jun 2026

ACHIEVEMENTS & CERTIFICATIONS

- Publication:** Co-authored "Privacy-Preserving Smart Contracts Using Zero-Knowledge Proofs," accepted for publication in Springer and presented at ICICC-2026.
- Certifications:** NPTEL Certified in IoT, Cloud IoT, and Edge Machine Learning, demonstrating continuous structured skill development.
- Web3 Credentials:** Earned JSProof and ETHProof certifications from Metacrafters, building strong core fundamentals in decentralized systems.
- Technical Research:** Authored comprehensive review papers on Blockchain Voting Systems and Zero-Knowledge Cryptography.
